Webinar on “CYBER SECURITY”

(16th December 2021.)

Department of computer science & IQAC Successfully organized a webinar on “CYBER SECURITY” on 16th December 2021.

The guest speaker for the session was Dr. Arjun V. Mane, a well-known Assistant professor in Government Institute of Forensic science, Nagpur. It was a very informative webinar as Dr. Arjun V. Mane enlightened the audience with a wide range of topics such as cyber-crime, online fraud, Net banking, UPI Payments, Cyber laws etc. The webinar began with a word of appreciation by the respected Principal, Prof. Dr. Dilip Garud Sir . The session saw an overwhelming response from PG, UG students of the department. A total of 395 participants including students and faculty, participated in the session.

Objective

A lot more has changed this year due to the pandemic, making professionals realize that their role will not stay the same in the contactless world tomorrow. Cyber-attack is now an international concern that hacks the system, and other security attacks could endanger the global economy. Therefore, it is essential to have an excellent cyber security strategy to protect sensitive information from high-profile security breaches. Furthermore, as the volume of cyber-attacks grows, companies and organizations, especially those that deal with information related to national security, health's, or financial records, need to use strong cyber security measures and processes to protect their sensitive business and personal information.

Financial Safety - Advisory

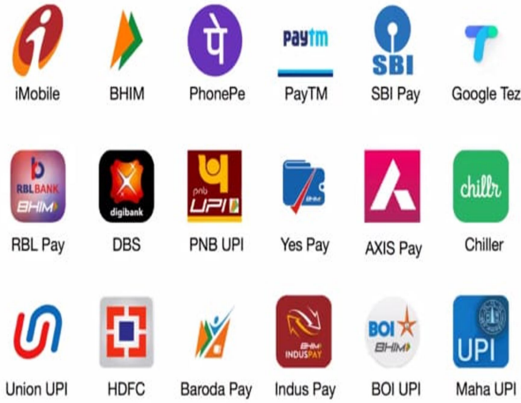

REC

- Never share OTP, CVV, PIN to anyone unless you are sure that you are on a Secure Payment Gateway
- Your account never blocked by any e-Wallet unless if you have done fraudulent activities
- Never download and install "anydesk" or "quicksupport" applications to complete re-activate process.
- Never share QR code or Scan received QR code for payments
- Never click unknown links for payment activities
- Never verify your KYC through a phone call or by a link
- Never search for Customer care number from Google / search engines
 - use App help desk only or look up the official website and call the number listed there
- Also, do not park your funds in one account so as to not lose much in case you do end up falling for such a trap.
- Avoid using public/open WiFi for financial transactions as they are a haven for criminals looking to intercept your connection and use it to steal passwords, banking or credit card information, and other personal data.
- When using a Secured network, make sure that the sites you are using are protected using SSL (Secure sockets layer), or consider using a VPN to protect your transaction
- SSL websites starts with HTTPS and has a padlock
