Exam Pattern

Preparation

IQAC
23/05/2022

Introduction

Chemical science, sometimes known as chemistry, is at the heart of so many modern scientific advancements and has played an essential role in human history and development. Chemical science explores the properties, behavior, and structure of matter, ranging from elements to compounds. The basics of chemical science are rooted in understanding the way different elements interact in various ways, such as combining to form new compounds or producing energy. Chemical science starts with a focus on the atomic structure of matter. Within each atom are protons and neutrons, which form the nucleus, and electrons, which form the atom's shell. The structure of the atoms determines the behavior and properties of matter. The chemistry of elements and compounds can then be studied to understand how they interact with each other. This includes understanding the electrons and the attraction between them or looking at how bonds are formed between elements.

Compounds are formed when two or more particles interact with one another and form new molecules. This can happen through different forms of bonding such as covalent, ionic, and hydrogen bonds. Chemical reactions involve breaking and forming bonds, resulting in a new substance. By understanding how chemical reactions occur, chemists can make predictions about the outcome of a reaction, or the yield and types of products that may be produced. This can be critical for new products or medicines, as well as for understanding the behaviour of existing products.

Analytical chemistry provides a means to measure and investigate the makeup of a sample. This can involve using spectroscopy to identify the atoms present, studying them through microscopy, or separating elements from a sample using chromatography. In this way, analytical chemistry provides a means to characterize a sample and understand its composition. Chemical science has opened up new frontiers in many areas. For example, in the world of food science, chemical reactions make it possible to create new products through fermentation and extraction. In medicine, drug molecules are designed through careful combinations of principles of chemical science.

The role of chemical sciences

Chemistry may need to be increasingly interdisciplinary, which will result in opportunities for innovation. There is likely to be a shift from blue-skies to problem-driven research. Increasing interaction between chemistry and other sciences, most notably the biological sciences, but also fields such as mathematics, engineering, and computer and materials sciences, was identified as the single most important theme for the chemical sciences over the next ten to twenty years. It is recognised that, over the last two decades, innovation has most often arisen at the boundaries of traditional subjects. Interdisciplinary is essential for tackling major challenges and driving new approaches to research. Advances in carbon capture and photovoltaics will involve further collaboration between chemistry and engineering, Chemistry is one of the most basic sciences necessary for the very survival of life on earth. As a graduate/student/postgraduate in chemistry or related subjects, your next goal would be to follow your passion and work line in the best possible. What would be more exciting than furthering your career in research? Some of you have also had the teaching bug bite you, making you find joy in sharing your knowledge with those who seek it. Research and lectureship in science are two

- careers that capture the very essence of the scientific world.

Thus, it is no surprise that lakhs of students all over the country aim to be the best in them. How do you get to your goal of being the very best? There are several ways, and the most preferable and suitable route would be to clear the CSIR NET Chemical Science exam. Qualifying for the CSIR NET exams provides you with the most incredible opportunities to research the country's top labs.

Preparation Strategy for Competitive Exams

There are several questions, which come into a candidate's mind before starting the preparation for the competitive exams. These questions may include:

- How to start the Government Exam preparation?
- What strategy should I follow?
- Can I prepare for Govt exams at home?
- Can I crack the Government exams in the first attempt?
- What are the tips to crack the competitive exams?
- What are the important topics and syllabus for the exam?
- What strategy and approach to use for the preparation of Government exams?

And the list of questions goes on and on. So, to ensure that a candidate follows the best approach, we bring to you 11 key strategies to crack the upcoming Government exams:

- **Set S.M.A.R.T. Goals** – Here S.M.A.R.T. stands for Specific Measurable Achievable Relevant Time-Bound. One must keep all these five goals in mind when strategising a study plan. Do not overburden yourself and set achievable goals

- **Self-Management vs Time Management** – Ensure that you set targets which you can achieve. Manage your schedule in a manner that sufficient time can be dedicated to the preparation

Attend Online/ Offline Classes Regularly – Choosing either online or offline classes in a candidate's decision but they must ensure that either way they attend the classes on a regular basis and any kind of ignorant behaviour shall affect their preparation.

- **Revise on a Daily Basis** – In most cases, it has been observed that one may understand the topic when being taught but due to lack of revision may end up forgetting such concepts. Thus revising things on a daily basis is a must

- Solve Time-Bound Exercises, Mock Tests & Model Papers – This will give an examination kind of atmosphere and a better understanding of the type of questions which may be asked
- Raise Doubts or Questions if any – Mostly it has been observed that candidates hesitate to ask questions for various reasons but this may act as a hindrance for any competitive exam aspirant. Always ask doubts or questions, if any to ensure that the concepts are extremely clear
- Choose Coaching/ Institutes/ Teachers Wisely – Choose the books, study material and resources wisely. Ensure that either online or offline, sufficient study material is provided, separate time for clearing doubts is given and proper revision and tests are conducted
- Get Your Concepts Clear – The key to answering any questions is by having conceptual clarity. Ensure that every part of the concept is clear and understandable
- Focus – Even if a candidate manages to devote 3 to 4 hours a day for preparation, an absolute focussed study must be done during this time. No kind of distractions must be entertained
- Solve Previous Year Question Papers – To understand the standard of exam and the exam pattern, the best solution is referring to the previous year question papers
- Be Regular, Well Planned & Disciplined – Having a proper study plan is a must. It is important that before one starts the preparation, he/she is well aware of the subjects, topics, exam pattern and the selection process for the respective exams so strategies a time table devoting equal time to all papers.

Chemistry is one of the most basic sciences necessary for the very survival of life on earth. As a graduate/student/postgraduate in chemistry or related subjects, your next goal would be to follow your passion and work line in the best possible. What would be more exciting than furthering your career in research? Some of you have also had the teaching bug bite you, making you find joy in sharing your knowledge with those who seek it. Research and lectureship in science are two careers that capture the very essence of the scientific world. Thus, it is no surprise that lakhs of students all over the country aim to be the best in them. How do you get to your goal of being the very best? There are several ways, and the most preferable and suitable route would be to clear the CSIR NET Chemical Science. Qualifying for the CSIR NET exams provides you with the most incredible opportunities to research the country's top labs.

The CSIR NET Chemical Science takes a lot of determination and a strong preparation strategy. These factors include study plans, best books, study material, acknowledgment of the complete syllabus, and much more. The candidates preparing for the CSIR NET Chemistry exam must go through every detail regarding the examination. The preparation strategy formulated for the Chemical Science exam takes a lot of factors into consideration. The single stoppage to all factors included in the adequate preparation for the chemistry exam. The CSIR NET Chemical Sciences Study Material, Study Plan, Previous year's question Paper, and much more.

Finally, we would suggest you not to stress so much when it comes to getting ready for an exam. We realize how crucial it is for you to ace an exam. But if you want to do well, don't worry so much about it. Just study hard and do your best and we promise good results will show. And most importantly, make sure to keep yourself healthy and fit during such times. Don't hang out with your friends too much or pay attention to things that will not help you do well. Instead, focus on studying. Competitive exams in chemistry require a comprehensive knowledge and technical proficiency in the field. Crack these exams successfully to get into a college of your choice and pursue your career in science. To achieve this, you need to understand the exam pattern, identify the key areas of focus, work hard, and practice consistently. Read on to discover some proven strategies for cracking competitive exams in chemistry. First and foremost, create a study plan. Have a clear idea of what topics you need to cover and allot time for each. To identify the key topics, review the syllabus and analyze the past years' exam papers. This will give you an idea of the level of complexity of the exam and the topics that are commonly tested. Having clarity on the syllabus and structure of the exam will help you stay focused while studying.

Next, devise an effective study strategy. Make sure you understand the topics you are covering by referring to textbooks, notes, and online resources. It is also advisable to attend online classes or webinars related to your subject. This will help you gain a better understanding of chemistry and learn tricks and tips to solve complex problems. Alongside studying, practice solving model test papers and mock tests. This is one of the most important strategies when preparing for chemistry exams. Assess yourself as you practice, so you know your areas of strength and weaknesses. This will enable you to identify concepts that you need to review and understand.

Adarsh college omerga Dist.: Osmanabad and the institute for Advance Studies (IFAS), India's No.1 Institute for CSIR-NET, SET, GATE-IIT-JAM, exam arranged webinar for life science, chemical science, Physical science and Mathematical science focusing on the success of Aspirant's, who want to make their carrier in academic and research, from 2002(20 years).

We, re present in 5 cities across India & U.S.A. and are growing every day. Our aim to focus on students can kick-start their preparation for competitive exam. This is totally for the betterment of the students' knowledge. We want to briefly guide them about what actually CSIR-NET, IIT-JAM and UGC-NET exam is? How this will helpful for students? What needs to be there agenda? How they can prepare for this and much more.

**DEPARTMENT OF
CHEMICAL SCIENCE**

ORGANIZES ONE DAY WEBINAR ON

**"STRATEGIES TO CRACK COMPETITIVE
EXAM IN CHEMICAL SCIENCE"**

IN ASSOCIATION WITH

INSTITUTE FOR ADVANCED STUDIES, PUNE
Resource Person's

Ms. Prajakta Chaugule
Institute For Advanced Studies, Pune

Platform: Google Meet

 **01.30 PM**  **MON, 23RD MAY**

Summary of the webinar:

A webinar on strategies to crack competitive Exam in Chemical Science in association with Institute for Advanced Studies, Pune and Adarsh college omerga, Dist. Osmanabad, MS 23/05/2022. The webinar was delivered through the Google meet platform and more than 450 participants in the webinar through Online mode. Hon. Principal of the college has welcomed and delivered his introductory address whereas Dr. More Balaji (Convener). The resource person of the webinar spoke about the topic. "strategies to crack competitive Exam in chemical science". His lecture started with an introduction to chemical science how to crack. He has welcomed the resource person and other participants in the webinar.

The webinar was highly informative, sound and comprehensive for the students, research scholars. More than 450 participants have enjoyed this webinar.
